Jl. Srinindito VII No.33, Ngemplak Simongan, Semarang Barat, Kota Semarang 50148

Fresh Geography graduate specialising in GIS, remote sensing, and coastal geospatial analysis. Experienced in satellite image processing, coastal ecosystem mapping, infrastructure surveying, and web-based spatial data visualisation. Proficient in ArcGIS, QGIS, and Google Earth Engine, with working knowledge of subsurface tools including Petrel and Kingdom.

EDUCATION

Universitas Negeri Semarang — Semarang, Indonesia
Bachelor of Geography (S1 Geografi), GPA: 3.50 / 4.00

Aug 2019 – Oct 2025

WORK EXPERIENCE

Kementerian Kelautan dan Perikanan (Ministry of Marine Affairs & Fisheries) Nov 2025 – May 2026
Surveyor & GIS Developer — MagangHub Kemnaker Batch 2, Semarang, Indonesia

- Mapped coastal ecosystems (mangrove, seagrass, coral reef) across Central Java using Google Earth Engine with Sentinel-2 and Landsat imagery
- Designed and built a multi-temporal Coastline Change Detector (CCD) app in GEE using NDWI/MNDWI shoreline extraction, cloud masking, 5 & 10-year change analysis, and GeoTIFF/Shapefile export
- Integrated a mangrove detection module into CCD using NDVI/EVI and MNDWI classification on Sentinel-2; conducted script optimisation and functional testing
- Built an interactive web dashboard (KKPRL) using HTML5, CSS3, JavaScript, Chart.js, and Leaflet.js to visualise national marine permit data with dynamic filtering and spatial analytics

CV Mitra Muda Rekayasa — Semarang, Indonesia
Surveyor

Mar 2025 – May 2025

- Executed field surveys across 200+ road points in Sukoharjo Regency, assessing street lighting (PJU) and road marking conditions for infrastructure planning
- Collected and processed GPS spatial data; digitised survey outputs in Google Earth and produced final maps using QGIS and ArcGIS
- Validated spatial database accuracy by cross-checking field data against existing records, supporting technical reporting deliverables

Dicoding Indonesia — Bandung, Indonesia

Feb 2023 – Jun 2023

Web Development Trainee — MSIB Dicoding x Kampus Merdeka Batch 4

- Designed and developed responsive web interfaces using HTML5, CSS3, and JavaScript (ES6+), applying cross-browser compatibility and UI/UX best practices
- Architected and tested RESTful API systems using Node.js and Express.js, implementing structured routing, request handling, and error management
- Managed full development workflow using Git/GitHub with feature branching, pull requests, and agile team collaboration

SKILLS

Subsurface: Petrel, Kingdom

GIS & Remote Sensing: ArcGIS, QGIS, Google Earth Engine, Google Earth, GPS handheld

Data & Programming: Microsoft Excel, Python, SQL, AutoCAD, JavaScript (ES6+)

Web & Visualisation: HTML5, CSS3, Node.js, Express.js, Chart.js, Leaflet.js, Git/GitHub

Languages: English (C1/C2 — CEFR), Bahasa Indonesia (Native)

CERTIFICATIONS

English: British Council EnglishScore CEFR C1 Advanced (2025) · EFSET C2 Proficient 72/100 (2022)

Web Development: Dicoding — Front-End, Back-End with JavaScript, Intermediate Web Development (2023)
